

## Get on board the Carousel !

**Saint-Sauveur, February 2<sup>nd</sup>, 2011** – Learning to ski has never been so original! Little skiers are invited to get on board Mont Avila's Carousel. Proud to offer its young clients a new learning area, Mont Avila innovates and welcomes a brand new carousel.

Without needing to get on a chair lift, which might seem gigantic to some little ones, the carousel is easy to reach at the bottom of the slopes, a few feet from the main lodge. Each youngster will be able to hold on to a bar, joined to a central rotating axis, in order to gently glide on the snow and make laps. They will this way learn to synchronize their body with the carousel, glide on skis and let go of the bar at the right time.

In addition, our new school slope welcomes them as well in the same kids' area. This little knoll initiates children to the sport, to control their skis and, most of all, feel safe on trails. A rare and beneficial activity for fun learning. The kids won't want to go back home !

Member of **Mont Saint-Sauveur International** group, **Mont Avila** demonstrates once again the importance of being a ski industry leader by offering new skiers such learning area. To watch a video of the carousel and get more information on **Mont Avila**, please visit : [www.montavila.com](http://www.montavila.com).
